2017 Corporate Governance Evaluation Results in Taiwan

About the “Corporate Governance Evaluation System”

In response to the market need for enhanced corporate governance reforms, the Financial Supervisory Commission ("FSC") issued the "Corporate Governance Roadmap" in December 2013 and the new one in April 2018, aiming to accelerate the implementation of corporate governance among Taiwanese listed companies, assist them with sound development and boost market confidence. According to the roadmaps, the implementation of corporate governance evaluation is one of the major projects with the goal of investors and enterprises better understanding the performance of corporate governance by comparing the evaluation results among companies.

In 2014, the Taiwan Stock Exchange Corporation (“TWSE”) and the Taipei Exchange (“TPEX”) launched “Corporate Governance Evaluation System”, conducted by the Securities and Futures Institute (“SFI”) annually. The FSC believes this evaluation system will make companies take corporate governance more seriously, encourage healthy competition among companies and cultivate a culture that companies voluntarily improve their corporate governance.

2017 is the fourth year of the evaluation and the results have been published on April 30, 2018. To see the results of 864 TWSE and 675 TPEX listed companies, please visit website at <http://cgc.twse.com.tw/frontEN/index>.

Evaluation Indicators

1. Weighting of indicator categories

The evaluation indicators comprise the following 6 categories and 99 indicators. The categories of the evaluation indicators and their weight are shown as Table 1:

Table 1: Categories of Indicators and Weight

Category		Number of Indicators	Weight Assigned
I	Protecting Shareholder Rights and Interests	13	15%
II	Treating Shareholders Equitably	14	13%

III	Enhancing Board Composition and Operation	32	32%
IV	Increasing Information Transparency	21	22%
V	Putting Corporate Social Responsibility into Practice	15	18%
VI	Other Matters	4	0
	Total	99	100%

Note: Type C indicators are classified under particular categories only on the basis of their nature, but are not factored into the weighting assigned to any category.

2. Calculation of scores

(1) Calculating scores for a category

Scores for a category are calculated in the following manner:

$$\frac{\text{Number of scored indicators in such category (not incl. Type C indicators)}}{\text{Total number of applicable indicators in such category (not incl. Type C indicators)}} \times \text{category weighting}$$

(2) Calculation of total scores

First, excluding the points for Type C indicators, the points for each of the five categories are calculated by weighting, and are then totaled to obtain the total score for all categories. Then, 1 point is added to the total for each C+ indicator, if any, and 1 point or more is deducted from the total score for each C – indicator, if any, to obtain the final total score.

Companies subject to evaluation

Except some companies with inadequate data (listed after January 1, 2017) or met certain regulatory circumstances, all TWSE/TPEX-listed companies were covered by the Corporate Governance Evaluation System.

Scope of Information to be Evaluated

The 2017 evaluations will be based on information disclosed by evaluated companies from January 1 to December 31 in 2017, including: corporate governance information posted to the Market Observation Post System (MOPS) website, in annual reports and on official company websites;

corporate governance incidents that occurred during the year; information on the operations or exercise of duties at the shareholders' meetings, board meetings, and the independent directors; the supervisory records of the FSC, the TWSE, and the TPEX; and information entered by companies on the self-evaluation website.

List of the evaluation results (in company code order)

[TWSE listed companies]
